

LED Light Up Drag Racing Tree

Assembly Instructions

Parts List

Complete Kit:

p/n FLG1320LED

Replacement Components:

- FLGDT-AC (Metal Sign w/ Holes)
- FLGDT-CB (Control Box & Harness)
- FLGDT-LK (LED Lights 8 white, 6 yellow, 2 green, 2 red)
- FLGDT-AC (Power Cord AC Adapter)
- FLGDT-HDWR (Hardware Sleeve/Screw Kit)

Assembly

1. Remove the plastic film from the metal sign.
2. Remove the LED lights from packaging. Match the colored LED lights to the corresponding colored spots of the metal sign. Feed the connector end of the light through the front of the metal sign.
3. Peel the double-sided tape from the back of the LED lights and adhere them to the sign while keeping them centered.

4. **Important:** The wiring harness control box will be located at the top of the metal sign. Before adhering the control box to the sign connect the LED lights to the wiring harness starting from the top and working your way down.
5. Peel the double-sided tape from the control box and adhere it to the sign.
6. Use the retaining clips provided to organize the wires so they do not show when viewing the sign from the front.
7. Attach the sign to a wall stud using the screws and spacers provided. (Note: If not mounting to a wall stud, you will need to use the appropriate anchors (not provided). It is the end user/installers responsibility to ensure the sign is mounted or anchored properly to ensure sign cannot fall.
8. Connect the power supply to the sign and enjoy!
